

PRODUCT INFORMATION

Product Name:	MOLOCHITE
Reference Number:	-
Coating Type:	Inert china clay aggregate.
Typical Uses:	As a <u>non-skid</u> aggregate for use with the Dacrylate range of floor paints.
<u>Instructions for Use:</u>	
Method One:	Whilst the final coat of floor paint is still wet, sprinkle the 'Molochite' evenly over surface. Spread Rate for Molochite: 1-1½kg per 40m ² depending on degree of 'non-skid' required.
Method Two:	<u>Immediately</u> prior to application of the final coat of floor paint, <u>thoroughly</u> mix into the paint, 1 kg of Molochite. <u>NB:</u> The paint/Molochite mix should be stirred at intervals during application to prevent settling of Molochite additive.
<u>Note:</u>	The roughness or texture of the non-skid surface can be reduced if necessary by the application of a further <u>thin coat</u> of the floor paint.

Data sheets are issued to supply **general information** on the product but without warranty. Since conditions of service and application are beyond our control we cannot accept claims for loss, damage etc., based on this information. Dacrylate will not accept any claim for consequential or incidental damages.
