

Environmental Policy

1st November 2021

Rev. 2.1

Policy Statement

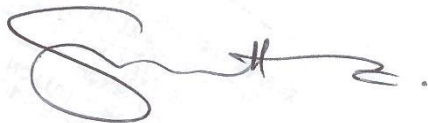

Dacrylate Paints Ltd. apply the principles of Corporate Social Responsibility to our business activities, with our responsibility for environmental management viewed as an integral part of productivity, competitiveness, and profitability. Environmental aspects of our activities have been identified and adequate financial and operational resources are in place to manage these as part of our wider business risks.

The company are committed to:

- Protection of the environment by reducing the environmental impact of our business activities,
- Prevention of pollution through continually improving our environmental performance,
- Fulfilling our compliance obligations by working closely with our local authority,
- Continual improvement of the environmental management system to enhance environmental performance,
- Promoting environmental sustainability throughout the supply chain.

The company recognises the significant environmental aspects associated with manufacturing industrial surface coatings from hazardous materials and ensure our employees are aware of their responsibilities and competent in their roles. We will engage with customers, suppliers, and other stakeholders to work in partnership with us to achieve our sustainability goals.

Dacrylate senior managers have established objectives, targets and KPI's to monitor and continually drive improvement in environmental management across the company.

Sharon Harte
Managing Director
Dacrylate Paints Ltd.
